Texas Emigration and Land Company! 320 Acres of Land for \$20--160 Acres of Land for \$10.

THE Texas Emigration and Land Company having derived their Grant from the late Republic of Texas, by contracts made with the President thereof, under authority of the special acts of Congress, approved 4th February, 1841, and 16th January, 1843, granting lands to Emigrants, will centime to give 120 acres of land to families, and 160 acres of land to single menover 17 years of age, until the 1st day of July, 1848, conditioned, that the family shall pay \$.0, and the single man \$10, for the acres of the single man \$10.

that the family shall pay \$3.0, and the sugle man \$10, for the surveying fees. A family, as defined in our Contracts, must consist of—

"A man and his wife, with or without children,"

"A widower with two or more children; if males under 17 years of age, if females, unmarried."

"A widow with two or more children; if males under 17 years of age, if females, unmarried."

"Two single men over the age of seventeen years, each one being stitled to 160 acres."

On his arrival in the Colony, the Emistrants should forthwith apply to the Ageat of the Company, Mr. Henry O. Hedgeoxe, residing at Stewestsville, in Benton county, who will at all three he redy to assist him in the selection of his land, and enter the same on books kept for that purpose, and give him a certificate therefor; which certificate will be evidence of his having settled in the Colony in due time.

Our Grant les in the North-Eastern part of Texas, between the Lind and 34th degrees of Latitude North, and 19th and 42nd desires of Longitude West, from Washington: beginning on the south side of Red River, at a point 12 miles east of the False Quachitat, running thence due South 160 miles, thence East 161 miles, thence Fast 161 miles, thence Fast 161 miles, thence North 100 miles, thence West 161 miles to the beginning, having a front on the meanderings of Red River of nearly 200 miles; and includes within its limits the upper and lower Cross Timbers, and the head waters of the Brasos and Trinity Rivers, the Truity being navigable for Steam Boats of light draught, from the interior of the Colony to the Gulf of Mexico, into which it empties, some 25 miles from Galveston, and lied River, to the Mississippi, affording an outlet for the surplus productions of the country. This portion of Texas is peculiarly adapted to the growth of wheat, experience within the last two years having tested the fact, that it will produce 49 bushels to the acre, weighing 50 to 39 pounds to the hashel. Indian corn, rye, barley, oats, sweet and Irish potatoes, peas, beaus, melons

The planting season commences in February and continues until July.

Colonel William Myers, who removed there from Garrard County, Ky., last ledl, says, in a letter dated 8th May, 1847.—

"I will not venture to tell one friends in Kentucky, because they would not believe it; but now I assert it, for the soil is deeper, being in many places five feet, and the kindest land to work lever put a plough in. I verily believe that around the forks of the Trinity, lies the largest body of first-rate land in America."

Let no Emigrant loose sight of the important fact, that our contracts with the Government of Texas-expire nu the 1st ray of July, 1842, and that he must not only be in the Colony, but that he must have selected his land, built a house or cabin thereou, and be residing therein with his family by that day;—one day after that date, and the opportunity of getting lands for nothing is, perhaps, lost for ever. Persons desiring additional information, by addressing the undersigned Trustees or either of them, post paid, shall receive prompt attention.

Trustees of the Texas Emigration and Land Company.

Prospectus of the Christian Mirror. Prospectus of the Christian Mirror.

This paper will be devoted to the discovery, illustration, and defence of truth—to the advocacy of whatsoever things are pure, lovely, and of good report. So far as it may be deemed expedient to give it a local character, it will aim more especially, to promote the interests of Apostolic Christianity to Keuthcky. But a brief outline of its intended course, can be here sketched.

1. A cambid and thorough examination of the questions involved in Church Organization and Co-operation, will be attempted. The Bilble society question will be considered. Much investigation of these subjects is yet demanded. Let no one deprecate discussion. In the midst of society in rapid progress, it is unavoidable, and is to be invited, rather than repelled. It is not discussion that is dreaded, but those angry personal ties, into which, even religious discussions too often descend. Arching

sition of the elementary principles, and ultimate

ims of the Reformation.

111. The subject of Education in ceneral and of Female Ed-

a brief exposition of the cichicutary principles, and ultimate aims of the Reformation.

111. The subject of Education in general, and of Female Education in particular, will receive such attention as we may be able to give. Hints, as no the best mode of instructing a family in the Sacred Scriptures, will be offered.

1V. Condensed reports from Churches and Evangelists, reports of State, Annual, and Co-operation meetings will be published; and any advertisement required by the common interests of the churches.

V. We shall endeavor to record in a few lines, the principal religious events of the times

VI. But especially, and above all things else, we shall invite our beloved brotherhood forward and upward to the higher grounds of godliness, brotherly kindness, and charity. It is mainly from a desire to accomplish something in this respect, that this prospectus is submitted to the public. The field we purpose cultivating, is not occupied fully by our writers, nor has it been. We shall, if possible, make the Mirror equal to our times, both in its mechanical and fiterary features, and yet, we shall aim to be useful rather than shining. Gladly will we forego the honor of being thought a philosopher—au accomplished essayist—a profound expositor, if we may but successfully invite the thousands of young professors away from the vannties of earth, to the enjoyment of the grace of Christ, the love of God, and the communion of the Holy Spirit. And whether we reason or discuss; reprove or rebuke; exhort or entreat; we intend that the paper shall, in some good degree, reflect the excellency of the knowledge of Jesus Christ our Lord.

Those to whom this prospectus shall be sen, are respectfully requested to interest themselves in behalf of our project. Should it succeed, the proceeds will shortly be appropriated to the benefit of a charitable institution, that every triend of the female or phan—that every philanthropist must approve. If our proposition is elificiently seconded, we shall be pleased, if not, we shall neither

REMARKS OF MR. WINTERSMITH on the amendment to add the 14th section to the Convention

Mr. WINTERSMITH remarked that he would like to suggest a few thoughts in favor of the proposition. The Constitution required the Legislature to ascertain as nearly as possible the number of voters in the State at the time of the election, so that Mr. WOOD, a bill to continue in force the law they might know whether a majority of them all for the appointment of Commonwealth Attorneys; had voted for a Convention. As the bill now reads. the Commissioners of Tax were directed to ascer-Mr. A. YOUNG, against the petition of George tain all who would be entitled to vote for the year 1848. This was done in March or April. In making the estimate, all then entitled, and all who should attain the right to vote before the election, by becoming of age or maturity of residence, were necessarily to be ascertained. It would be impossimortality would be, that in the year, twelve per cent. four months intervening between the taking of the a contract which had been so palpably violated by lists by the Commissioners, and the time of the election, the reduction by death and removal would be about four per cent. This would make a difference

He thought that no fair interpretation of the Constitution could authorize the passage of a law, and some worthy children, who ought to inherit it; by which these votes should constitute a part of the aggregate number of voters, a majority of which, property for those children, who desired it, rather than let the wife have her third when she had already the contrary, it was manifestly clear, that the Conhad her own even to the last tea spoon. He thought vention should only be required to obtain a majority the case did not come within the letter or spirit of the of the actual voting population. The bill of last session, and the present bill, are both deficient in Mr. BULLOCK said if he understood the case, it this particular. (Mr. Williams' remarks will be given to-morrow.) He was afterwards stationed there as an instructor in artillery tactics-an appointment which evinced his high merit, as it has never been conferred except upon accomplished officers, whose morals and prinstitute, viz: that Benjamin Collins, be restored to all ciples are known to be unexceptionable. In the Florida war, to serve in which he resigned his post at West Point, he added much to his already high character, by the fidelity with which he discharged his arduous duties while in command of the pioneer company; and for his gallantry and good conduct at that period, he was brevetted. Such being, in brief, the distinguished services of this accomplished officer, it is with pride that we notice his recent brilliant career, and add his name to the list of those who

are claimed by Jefferson county as her favorite sons The attack on the foundry, better known as El Molino del Rey, was assigned to Col. Garland's brigade, forming the right of Gen. Worth's division, nearest to Chapultepec-Capt. Robert Anderson commanding a detachment of the 3d Artillery, acting as infantry, being at the head, or near the head of the column. The service was expected to be desperate, and this gallant Kentuckian, writing to his family late on the night of the 7th, says: "We start half an hour before daylight for an attack on the enemy; our brigade is on the right, and our loss will doubtless be very heavy. Should God spare my life, I will rasmue this letter the earliest moment after victory." This remark is strikingly characteristic of the spirit which has animated our noble army: with a desperate service before them, and expecting the fiercest resistance, they have always expected victory, and in their language and conduct exhibited a coolness and self-confidence which led inevitably to that result. Leaving their quarters on the morning of the 8th

of September, about half past two o'clock, they were detained some time in the streets of Tacubaya, where Gen. Worth's division was quartered, and then marched to their position in front of the building known as El Molino del Rey. Here they were halted, and the men ordered to he down in the road, to conceal themselves from the troops in Chapultepec. At the dawn of day they were ordered to advance. At this moment the firing of cannon and musketry was very heavy on their left. Approaching to within 100 yards of the foundry, they receive ed an awful shower of grape and musketry, and the column was halted, and sheltered for the moment, against a wall on their right, which at that point threw out a shoulder that intercepted the balls. Capt. Drum's artillery here came into play, and as there were but few men at the pieces at first, Capt. Anderson, leaving his own men, and his sheltered position. ran out to assist in unlimbering the guns. Having aided in placing one gun in position, and seeing that the men were slowly bringing up another by hand, he stepped back to them, and seizing the trail, helped to place it also in position, braving, in this voluntary exposure, a torrent of bullets, which nothing but the most daring and determined bravery could have withstood. As he turned from this gallant service to rejoin his regiment, a few paces in the rear, he was struck by a musket ball, which penetrated his right shoulder with such force that he staggered and was near falling; in a moment after he received three slugs in his left arm. Without raising his arm, without a complaint, or any intimation whatever of being wounded, the chivalrous Kentuckian remained with his men, waiting the signal to advance. An officer remarked that there was blood on Capt. Anderson's cloak, which he had worn, (having been for some time suffering from a severe attack of the ague,) under the hope of keeping off the chill that day-but although he felt the current of life trickling from a frame already reduced by disease, he had no thought of abandoning the duty or relinquishing the laurels that lay before him. A moment more, and a voice was heard calling out

"Come on!" Capt. Anderson stepped out and saw Lieut. Itierce. of the 4th Infantry, in the road, waiving his hand, the 4th and 7th Infantry being in front, and immediately in advance of the 3d Artillery. Anderson gave the word "Forward! 3d Artillery!" and rushed on. Lieut. Pierce was shot down while calling to him. Very soon, Anderson, disabled, as he had been, was in the inside of the enclosure, being, as we are informed by an eye witness, one of the three first officers that entered. Yet the small, but indomitable, band of Americans pressed on against numbers vastly superior, and covered by walls, while exposed themselves to a fire from every side, and drove the enemy, with great loss, from his strong hold. Here the Captain received another wound from a bail which passed through the right leg a little below At my Ware Room on Ann St. near the Welsiger House. the knee. The capture of this point, against such odds, and Capt. At my Factory in Madison, Indiana, I am finish the most brilliant achievements of the war. The gallant. Capt. Ayres, and the no less gallant Andrews, also bore most conspicuous parts in this heroic as sault.

The work was not over. Bravely as our noble fellows had waded through blood and peril to gain the enclosure, they had as yet only reached a position where the battle raged most fiercely; and death was sweeping off its victims at the moment when victory seemed almost within their grasp. The enemy kept up an incessant fire from the houses and walls around, and made repeated attempts to dislodge our troops, without success. For two hours this devoted band maintained the position they had gained, and held the enclosure against unremitted, bold, and destructive attempts to dislodge them; for two long hours they stood, "few and faint, but fearless still," barely holding what they had so hardly won, but holding it with a grasp so tenacious that it could only be loo sened by death. At the end of that time a senior officer arrived with reinforcements, and took the responsibility of command. The fighting and the excitement being over, Capt. Anderson became faint from loss of blood, and found his wounds stiff and painful. A draught of spirits from the canteen of a soldier gave him temporary relief-but he was compelled to lie down-to rest literally on the bed of honor. In a short time he was able to be moved; and being placed on a horse, and accompanied by a brother officer, he was taken back to his quarters.

The wound in Capt. Anderson's shoulder, after receiving which he led his command gallantly for two hours, bearing the brunt of the fiercest of the battle, and performing most valuable services, was so severe as to disqualify him from subsequent duty, and to require his return home to recruit from its effects. The ball is not yet extracted, and his right, arm is still, perhaps permanently, disabled, though it is hoped the use of it may be restored.

"RUSSIA AND THE RUSSIANS."

(CONTINUED.)

The Nobility of Russia consists of some ten or welve grades; the highest in rank are the descent he Baltic with the Black Sea and the Caspian, will dants of the ancient Princes, of the Dukedom, prior give him the power to invade the contiguous nations, to the Empire, and those who are created by the at the same time, his standing army, permitted, from Emperor in consideration of eminent public service; this power of sudden concentration, to be reduced then Counts; then an inferior grade of Princes. in numbers and expense, is engaged in preserving All officers of the Army who reach the grade of the public peace at home. With this interesting Colonel, are considered as ennobled; but society, as Nation, we have always maintained a friendly interthe lugher circles are called, consists only of the course. It is a sublime spectacle-worthy the confirst four or five grades. These all receive a liberal education, and many of them are permitted to travel into other countries, and are distinguished by their polished manners, and their intellectual accomplish. As to them, the Temple of Janus has been always ments. Many of the Nobility have immense estates. including often 10,000 Serls, with more land than new to you an expression of the sentiment in which, they can cultivate. The deference paid to them by the Peasantry, is more marked than with our Republican notions we could conceive it to be possible. It will be difficult, in the limits allowed to these remarks, to dwell upon the manners and customs of the Nobility or of the etiquette which is so exacting earth to be at peace, at the Court; but I may be allowed to pause a moment on the female character of the wealthier classes. These are educated in a liberal style, and many of their accomplishments are useful, as well as ornamental. They have a fine taste for music, and embroidery, of which latter, I have some elegant specimens, as Souveniers, in return for American books. The children of both sexes are taught from an early period to observe the most courteous manner, and a laudable neatness of dress, in which they as much deserve to be models to our own children, as in their remarkable efficiency in the knowledge of modern languages. I have often heard the children at the family table, speak in four languages French, German, Russian and English, and acquired in the order mentioned. The three qualities for which the Ladies merit particular notice, consists in their graceful movements, neat costume, combining richness, with simplicity and unaffected manners; in all these they excel the more intellectual English, and the sprightly, though less dignified French, and I hope I may be pardoned for saying, that in these respects, they are in advance of our own Ladies, though in treshness of beauty, in symmetry of form, intellectual vivacity and real nobility of character, every American who travels abroad, will admit that our own have no superiors in any land.

The second class of persons in Russia, consisting of the various grades of Merchants, the Shopkeepers and Handicraft Tradesmen, have many peculiar qualities; they adhere in dress, to the national costume, though in a style more European than that of the Serf. As traders, they are astute and enterprizing, and Peter well described them when he told the M. E. Sir Knight Basier Epperson, of Frankiort, G. S. Jews on entering his Empire, that "they were welcome to cheat his subjects if they could." class is making rapid strides in intelligence and in the useful qualities of the citizens, and form, with the Seris, objects of deep solicitude in the ameliorating measures of the Emperor. The Serfs, amounting to forty millions, of which fifteen millions belong to the Crown, are objects of great interest to the traveler. Up to the middle of the sixteenth century, the 29th day of this month, to select delegates to attend the there were no slaves in Russia, except a few prisoners of war, and the Peasants, or agricultural workmen, the most numerous class of inhabitants in tional Whig Convention, to nominate candidates for President Russia, could change their abode once a year, on and Vice President of the United States. the 23d of April, St. George's day. One of the Czars or Rulers, Boris Godanoff, about the middle of the sixteenth century, decreed that in future no Peasant should have the right of changing his master, and should remain forever the resident of the same place, so that by selling the landed property, the Peasants also, were sold. The successors of the Czar Boris, up to the time of the Emperor Alexander, (1800,) gave away a large quantity of crown land to the Nobility, as a remuneration for their anxious to see the Government administered in accordance with services, and transferred the Peasants who resided the views and plan of Washington, are earnestly requested to on those lands; thus converting free Peasants into attend. Serfs, or slaves, up to the eighteenth century, when Catharine the 2d declared that they were not slaves, but only vassels or Peasants, attached to the glebe. The Emperor Alexander, at his accession to the Throne, prohibited the further distribution of Government lands inhabited by Peasants, and in 1815, undertook the task of liberating the Peasants of Russia. He persuaded a majority of the proprietors of estates, in the three western provinces of the Empire, called the Baltic provinces, containing 2,000,000 of inhabitants, to give liberty to their Serfs on certain conditions. These were discussed by a committee of the proprietors and approved by the Emperor. No disturbance grew out of the arrangement, and in 1823 there remained no slave in these provinces. If I had the time I could describe the process of this gradual emancipation; merely remarking that the liberated Serfs were not allowed to leave those provinces, nor to go into the interior provinces where slavery still exists. In the last twenty years, the Emperor Nicholas has enacted several laws securing privileges to the Seris in the remaining provinces of Russia; such as that no Serf could be sold separately from his family, nor the family from the estate, nor that the proprietor should require of the Serf more than three days labor in the week. Half of the whole number of Serfs do not work on the land of their proprietors, but pay him a certain sum and receive from him a portion of land. Many Peasants buy their own ime, and are engaged as Artisans or Shopkeepers

LIFE INSURANCE.

NAUTILUS (MUTI'AL LIFE) INSTRANCE COMPA-NY, No. 29, WALL STREET, NEW YORK.

NY, No. 29, WALL STREET, NEW YORK.

This Company, which confuses its business exclusively to Life Insurance, has now been in operation two years and a half, during which period it has issued 15x3 policies, and for the first eighteen months it experienced no loss. Its losses for the whole time have been less than \$18,000—leaving an accumulation of about \$65,000 on hand, beyond the payment of claims and expenses. This, added to the original guaranty capital of \$50,000, places the security of the Company on a basis so solid as no longer to admit of a rational doubt.

All its profits accure to the credit of the dealers, and are divided annually among them, whether the policy to issued for a limited period or for the whole term of fine, a feature unknown in the charter of any other Mutual Life Insurance Company incorporated by this State.

Two dividends of 50 per cent, each, on the amount of premi-

in the charter of any other Mutual Life Insurance Company incorporated by this State.

Two dividends of 50 per cent, each, on the amount of premiums received, in accordance with the provisions of the charter,
have been declared, and are credited to the accounts of the assured, and for which scrip certificates will be issued.

A dividend of 6 per cent, on the tirst year scrip has likewise
been declared, payable in eash, to the holders thereol on demand,
at the office of the Company.

For pulicies granted for the whole term of life, when the premium therefor amounts to \$50-a note for 40 per cent with interest at 6 per cent,—mithout quaranty, may be received in part
payment, or it may be paid in cash, in which case it is expected,
should the party survive to make 13 amual payments, leaving the
dividends to accomulate—the policy will be fully paid for, and
the accompulation ultimately added to the policy.

For further information, the public are referred to the pamph
lets, and forms of proposal, which may be obtained at the office
of the Company, or any of its Agencies.

RENTUCKY MILITARY INSTITUTE.

This Institution, created by an Act of the General Assembly will be opened for the reception of Pupils, On the 1st of March, 1847, under the lumediate di-rection and entire courrel of a Board of Visitors,

Appointed by the Executive of the Commonwealth.

Appointed by the Executive of the Commonwealth.

I contemplates a Military Organization for Literary and Scientific purposes; an education enineutly scientific and practical; the formation of regular habits, and the diffusion of a knowledge of Military Science.

Military duties will not be permitted to interfere with the pupil's progress in study, but will rather take the place of his unprofitable, and often, vicious play.

The course of Study adopted, and which will be required in order to graduation, is that usually taught in the best Colleges, except that but one language is required, (Latin or French,) the time usually occupied by the second, being devoted to a more extended course in Mathematics, Natural Science and English hit-

tended course in Mathematics, Natural Science and English Literature.

A Preparatory Department is organized in connection with the Institute, in which boys of any age are taken, and are subjected to the same Military discipline as the Cadets.

The position of the Institute, at the Franklin Springs, near Frankfort, Kentucky, (recently occupied by the Franklin Institute,) is admirably adapted in every respect to Academical purposes: the locality being airy and lealthy, the mineral waters salubrions, the buildings elegant, extensive and commodious, and entirely apart from the contamination and multiplied malipuinifluences, which seem inseparable from a city or village residence. The Institution is placed under the charge of Col. R. T. P. ALLEX, as Sprekhyllshelf, as a competent and successful teacher and governor of vooth, by his honorable graduation at the United States Military Academy; his subsequent connection with the Army, and with the Engineering Service of the General Government, as Superintendent of public works; by his long experience as an Instructor, by his recent connection with the Transylvania University.

The Academic Year will be divided into two Sessions

The Academic Year will be divided into two Sessions

of twenty one weeks each.

The first commencing on the 1st Monday in October, and the econd on the 1st Monday in March. The only vacation occupying the months of August and September.

The month of July will be spent in an excursion torough the State, for the better study of its Geology and of Natural Science

generally.

Applicants for admission, on paying the charge of the Institute, and presenting a certificate of good moral character, will be admitted into the classes as their advancement may justify, and upon satisfactorily passing the next examination thereafter, will be entitled to a warrant of appointment, as Cadet, from the Governor. The uniform of the Callets is plantand neat, and being of Kentucky Jeans, will greatly reduce the expense of their clothing

Dr. Penney's Ague Pills.

Dr. Penney's Ague Pills.

In presenting the public with this remedy for the most troubles some of Western diseases, I am not unapprized of the opposition that it will at first meet; for the community has suffered much by the Impositions and frauds practiced by the getters-up and venders of patent nostroms, specific remedies, and medicines professing to cure all diseases. So much have the people suffered from such infractions on their credulity, that it would seem fonlish in any one, at this day, to introduce a specific for any Disease; but I do it, and do it too, sanguine of success. Having had ample opportunity to test the efficacy of the Ague Pills now presented to the public, I do assure it, that they have never failed to cure in one solitary case where the directions were strictly observed.

They seem equally as well adapted to Agues of long standing as more recent ones. I could adduce a great many certificates in support of what has been said above, as regards their success; but that would swell, immecessarily, this publication. A few respectable witnesses are worth a host that are otherwise. See what Ir. John McRoberts, Dinggist and Physician in Lawrenceburg, Kentucky, says, whose acquaintance with the Ague Pills is better than that of any other person.

LAWRENCELURG, Ky., Oct. 1847. t I have been selling Penney's Ague Pills as local Agent for this place since some time last spring; and in every solitary instance that has come to my knowledge, the have succeeded in curing the Chills and Fevers. I heartily re ommend them to the public, as a remedy JOHN MCROBERTS.

CAMDEN, ANDERSON COUNTY, Ky., Oct. 1847. This is to certify, that I have been acting as Irr. J. E. Penney's ocal Agent at this place, in selling his Ague Pills; and in mease have they failed to cure, where the directions have been followed.

ELIJAH ORK.

SALT RIVER, ANDERSON COUNTY, Ky., Oct. 1847. This is to certify, that my grand daughter was afflicted with Chills and Fevers last spring. I procured one box of Penney's Ague Pills, and gave them by the directions; she was promptly and effectually cured. Some of my neighbors have used them with like success.

DAVID EBBERT.

ANDERSON COUNTY, Ky., Oct. 1847. ANDERSON CHESTY, My, Oct. 1841.

Severely afficted with Chills and Fevers. I procured two boxes of Dr. Penney's Ague Pills; we took them by the directions, and neither one of us had another Chill after we commenced their use. Some of my neighbors have also used them, and, so far as my knowledge extends, with complete specess.

JAMES EGBERT.

This is to certify, that I had a gentleman in my employ who had been for some time afflicted with Chills and Fevers. He procured and used one and a half hoves of Dr. Penney's Ague Pills, which effectually cured him. Given under my hand, &c., Any person taking two of the boxes by the directions, and not heing cured of the Agne, my Agents are authorized to refund his money; but in no case will the money be refunded, unless the Agent is satisfied that the directions have been strictly followed, and at least two of the boxes taken. One box will cure five out of six cases
